Stoffenmanager:
one year after the
1st Implementation
Meeting

2 October 2012
Amsterdam, The Netherlands
Erika Ustailieva, MSc , TNO

Outline

▶ New developments from 2011 till now

▶ International users of Stoffenmanager

▶ International Development Project (2010-2012)

▶ International Development Strategy

**Stoffenmanager**
Working safely with hazardous substances

What is new?

Stoffenmanager App

- Smartphones
- Available mid November, 2012
- In app store
- Information: karin.overdijk@tno.nl or check the website!

Project Implementation workplace Stoffenmanager

- ▶ Started in January 2012

- ▶ Duration 2.5 years

- ▶ Sponsored by ZonMw

- ▶ Stoffenmanager central

- ▶ 45 Dutch companies

- ▶ Sectors

  - Paint and Printing ink manufacturing industy (VVVF)

  - Rubber and Plastics manufacturing industry (NVR)

 - Plastics Composites (VKCN)

- ▶ Open for other companies

7-step implementation evolutionary ladder

Intake per company

Creating awareness

Orientation on approach

Understanding: qualitative risk assessment

> Solutions: quantitative risk assessment

Control measures & action plan

Implementation

Assurance: PDCA cycle

Results: number of companies per step

Aim: all participants to move 2 steps up the ladder!

How?

Development of knowledge about implementation successes & failures

- Stoffenmanager (specific)
- Sustainable chemical management (in general)

Active coaching of companies in chemical management

- Joint common training
- Personal company visit
- Personal online coach
- LinkedIn group

Stoffenmanager language versions

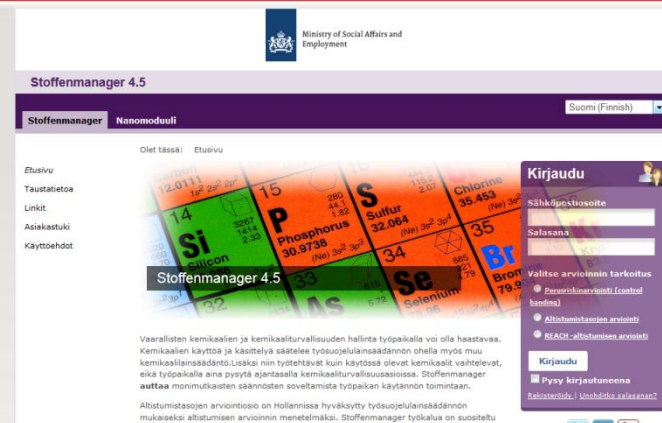

▶ Dutch and English

- https://www.stoffenmanager.nl/

▶ German

- GESTIS Stoffenmanager

- Institute for Occupational Health and Safety of the German Social Accident Insurance (IFA), September 2011

- https://gestis-stoffmanager.dguv.de/

▶ Finnish

- Finnish Institute of Occupational Health (FIOH), July 2012

- http://fioh.stoffenmanager.nl/

2nd International Scientific Advisory Board(ISAB) Meeting

- ▶ 1st October 2012

- ▶ Topics: three harmonization working groups:
  - Hazard banding using GHS/CLP: joint proposal TNO/IFA
  - Control banding of nano materials
  - ATEX for explosion safety

- ▶ Results of the working groups fed into the joint ISAB meeting for decision making and an action plan
  - Link ISAB to discussion on control banding of nano materials
  - Scientific publication on revision of the hazard banding model of Stoffenmanager in line with GHS/CLP
  - Join efforts to combine the existing systems for explosion safety
  - Dermal exposure combined with other exposure routes
  - Calibration of the algorithm for quantitative assessment for metal industry
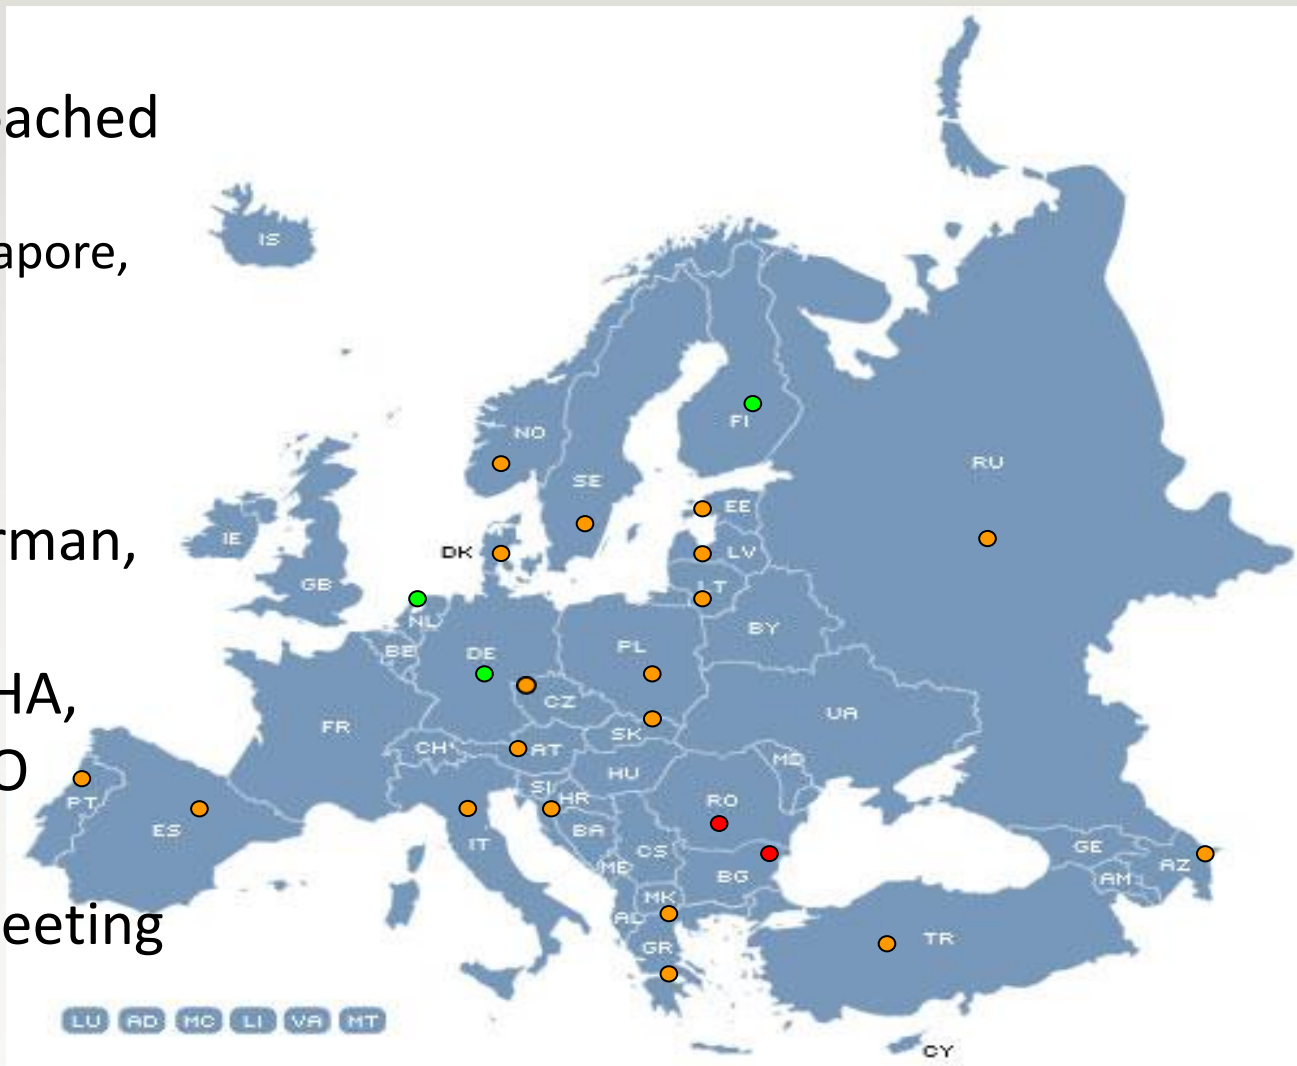

International users of Stoffenmanager

- ➤ **~ 15 000 users**
- ➤ **35% outside NL**
- ➤ **Each month some 100 - 150 new users**

Users world wide: Google Analytics (September 2012)

Countries	Users 2011	Users 2012
Netherlands	9462	9834
Germany	727	895
Belgium	614	751

International Professional Development Course

▶ 9th IOHA International Scientific Conference

▶ Kuala Lumpur, 16 – 20 September 2012

▶ 20 participants

▶ Malaysia, Singapore, Korea, Taiwan, Australia and New Zealand

▶ Results:

- enthusiastic participants
- will start using the tool
- possibly new country versions
   /sector versions

Stoffenmanager
Working safely with hazardous substances

Stoffenmanager International Strategy

▶ Aims

**To establish Stoffenmanager as an internationally recognized, accepted and used tool.**

- Compliance with EU regulations
- Up to date with new scientific developments
- Same in all national versions
- Quality assurance
- Participatory approach

Stoffenmanager
Working safely with hazardous substances

Stoffenmanager International Strategy

▶ How?

- Promotion: EU MS and acceptance by authorities
- Guidances and agencies (Bilbao) websites
- Training, training materials different levels
- Country versions
- International Implementation Meetings(once per year)
- Stoffenmanager Community
- Harmonised backbone all national versions
- International Scientific Advisory Board (ISAB) (once per year)
