

Price list CARPET 3, 2024

Prices of the base-version, the four plug-ins and the CARPET C++ library, per computing platform, and for a license period of two years are summarized in the table below. A license period will be no longer than two years.

Product	Price, VAT excluded
CARPET 3 base-version	€500
TERPEM-light plug-in	€2,800
Multi-burst plug-in	€2,200
Multi-scatter target plug-in	€2,200
Python plug-in	€5,000
Three days CARPET training course	On request
CARPET C++ library	€14,000

Please note the following:

- The CARPET 3 library refers to either a DLL, MacOS or Linux library of the ‘engine’ of CARPET 3, which includes all plug-ins except for the Python plug-in. The interface of this engine contains a set of C++ function (such as CreateRadar, SetTransmitter, GetPd, GetFirmTrackRange) which can straightforwardly be called from C, C++, Fortran, Java, and slightly less straightforwardly from MATLABTM. CARPET 3 can therefore be linked with in-house developed software packages.

Non-proprietary use, *i.e.*, commercial exploitation of such a software package, requires an agreement with TNO. Similarly to the GUI-version, the CARPET 3 DLL or Linux/MacOS library will also be time-limited and restricted to a single platform.

- In contrast to CARPET 1 and 2, CARPET 3 is aware of the expiry dates of plug-ins and of the base-version. In case a plug-in is purchased later than the base-version, the base-version expiry date will be set to the plug-in expiry date.
- Also the CARPET 3 library has a 2 year life-time, which is controlled by a license file.
- CARPET 3 can read CARPET 2 settings files. CARPET 3 writes settings files in an encrypted file format.
- The sales and maintenance of CARPET 2 has stopped.
